

Huge TNS Introduces Ultra-Fast 5G Solution Leveraging Top Networks in South Africa

Huge TNS, a division of the JSE-listed technology firm Huge Group, unveils the launch of its latest innovation. Partnering with industry giants MTN and Vodacom, Huge TNS unveils a game-changing wholesale agreement, ushering in a new era of network agnostic solutions for customers nationwide.

The new 5G and Fixed LTE solution leverages off both Vodacom and MTN as last mile providers, allowing Huge TNS to provide the widest coverage possible across South Africa. The hassle-free solution offers both Uncapped and Capped bundles without complex pricing details.

Further, this solution boasts a generous Fair Usage Policy (FUP) on all Uncapped Plans.

This provides SMEs with the ultimate flexibility of both a primary option as well as a dependable fallback solution.

Matthew Venkatesan, the Business Development Director at Huge TNS, highlights a significant milestone: Huge TNS is the pioneer Internet Service Provider (ISP) to offer price parity between Vodacom and MTN, ensuring access to the highest-performing products for its clientele.

Huge TNS remains committed to innovation, consistently delivering tailored solutions that address the evolving voice and data requirements of businesses. Customers can conveniently augment their connectivity with Voice APN solutions, ensuring comprehensive coverage.

With seamless and expedited deployment facilitated by the company's extensive national footprint, this solution caters to SMEs across the country, serving as both primary connectivity and failover support. This new solution allows Huge TNS to empower businesses across South Africa with cutting-edge connectivity solutions.
